

2021 Pennycress Field Day

Thursday, May 20, 2021

10:00am-12:00pm

Western Illinois University

Agriculture Field Laboratory

North of the Harry Mussatto Golf Course on Tower Road

Macomb, IL

***No registration required* and free to the public**

This day has been established to introduce the new winter annual crop Field Pennycress to local producers. Researchers along with industry representatives will be present to discuss this very unique short season crop. We are also excited to announce the launch of the IPREFER NIFA-CAP project, infusing \$10 M dollars towards the development and commercial launch of pennycress in 2022. We will discuss the results from the previous year and have a chance to tour the plots.

The day is set up as a guided tour through the plots with plenty of time for pictures and individual questions.

If you have any questions or would like to bring a large group, please contact Dr. Win Phippen for more details at wb-hippen@wiu.edu.

Check the IPREFERcap.org website for updates and video clips
