

2023 Pennycress Field Day

Thursday, May 25, 2023

10:00am-12:00pm

Western Illinois University
Agriculture Field Laboratory

North of the Harry Mussatto Golf Course on Tower Road Macomb, IL

<https://goo.gl/maps/B3cogaRP8YvjjvDq8>

*No registration required and free to the public

This day has been established to introduce the new winter annual crop Field Pennycress to local producers. Researchers along with industry representatives will be present to discuss this very unique short season crop. We are also excited to introduce the IPREFER NIFA-CAP project, infusing \$10 M dollars towards the development and commercial launch of pennycress along with the \$13 M dollar USDA-DOE IPREP project focused on abiotic stresses impacting pennycress production.

We will discuss the results from the previous year and have a chance to tour the plots. There will be plenty of time for pictures and individual questions. If you have any questions or would like to bring a large group, please contact Dr. Win Phippen for more details at wb-hippen@wiu.edu.
